## GETTING STARTED

In this section:

- ✓ The basics of healthy eating
- ✓ Planning meals
- ✓ Types of eating plans

\*Individual results may vary.

## The basics of healthy eating

Healthy eating is an important part of managing your diabetes along with being active and taking medicines, if needed. Why? Because what, when, and how much you eat affects your blood glucose (*blood sugar*) levels.

Healthy eating doesn't mean you have to stop eating your favorite foods and dining out. But you may need to limit how much and how often you eat some of them.

Healthy eating is when you:

**Eat a wide variety of foods each day**

**Watch your portion sizes**

**Space your meals evenly throughout the day**

**Don't skip meals**

Use this booklet as a guide to plan healthier meals. It's not easy to change what and how you eat. Give yourself time to get used to your new routine. Soon you'll be enjoying healthy, delicious meals and snacks as needed.

## Planning meals

An eating plan is a guide that helps you choose what foods to eat, when to eat meals and snacks, and how much to eat. A typical healthy plan includes:

**Complex carbohydrates**, such as whole-grain bread, oats, and brown or wild rice

**Fiber**, which is found in beans, whole grains, fruits, and vegetables

**Lean protein**, such as chicken (without skin), fish, tofu, and eggs

**Non-starchy vegetables**, such as broccoli, carrots, and leafy greens

**Low-fat dairy products**, such as milk, yogurt, and calcium-fortified plant-based milk

**Heart-healthy fats**, such as olive or canola oil, nuts, and seeds

Visit [NovoCare.com](https://www.novocare.com) for healthy recipes and guidance on well-balanced meals.

For many people with diabetes, the hardest part of a treatment plan is deciding what to eat. There is no such thing as a “diabetes diet.” But you can work with someone on your diabetes care team to figure out what eating plan makes the most sense for you and your treatment goals. That person might be a dietitian, diabetes care and education specialist, or a registered nurse.

The goal of healthy eating is to help manage your:

Blood glucose levels

Cholesterol levels

Weight

Blood pressure

When these things are managed, you may prevent or slow down the chance of getting other health problems.

## Types of eating plans

Many different eating patterns can help you manage your diabetes. Here are some common eating patterns that have shown benefits for people with type 2 diabetes.

### Carb counting

The amount of carbohydrates (*carbs*) in your meals and snacks can make a big difference in your blood glucose level. That’s why it’s good to be aware of how many carbs you eat.

Carb counting is one of many meal planning options. With this plan, you count the amount of carbs you eat and drink at each meal and snack. You and your diabetes care team will set the right amount of carbs for you.

Carb counting gives you many choices and lots of flexibility when planning meals.

If you take insulin, counting carbs can help you know how much insulin to take. Read *Advanced Carb Counting* on page 30 for more information.

#### Carb counting tips

- Eat 3 meals a day about 4 to 6 hours apart
- Do not skip meals
- Try to eat the same amount of carbs at each meal

## The plate method

The American Diabetes Association recommends using your plate to create healthy meals. The plate method is a simple way to manage portion sizes and eat balanced meals. You don't need to count anything.

Start with a 9-inch plate and imagine you have split the plate in half. Then divide one of the halves into two. Use the plate below as a guide to help you build a healthy meal.

You can make your own plate with your favorite foods. Use the list starting on page 45 of this booklet to find the foods you like.

## Mediterranean

With this kind of eating plan, you have mostly plant-based foods. These are fresh vegetables and fruit, whole grains, beans, nuts, and seeds. Olive oil is the main source of fat. This plan also includes a small amount of dairy, fish, and poultry.

Following a Mediterranean eating pattern can help protect your heart. It may also help you lower your A1C and triglycerides (a type of fat in the blood).

## Vegetarian

A vegetarian eating plan is when you only eat plant-based foods, such as vegetables, fruit, whole grains, nuts, seeds, and beans. Some plans do not include any animal products, including dairy and eggs. A vegetarian eating plan gives you lots of vitamins, minerals, and fiber.

Following a vegetarian eating plan may help lower your A1C and cholesterol levels. It may also help you manage your weight.

Visit [NovoCare.com](https://www.novocare.com) to "Ask Sophia!" She is a digital assistant that can answer questions about diabetes and so much more!

## DASH

DASH stands for “Dietary Approaches to Stop Hypertension.” It is an eating plan that is high in fiber and suggests eating more vegetables, fruits, whole grains, nuts, seeds, plus low-fat dairy products, poultry, and fish. The DASH diet limits red meat and sugary and salty foods.

Following this eating plan can help to lower blood pressure in people with high blood pressure. It may also help you manage your weight.

## Low carb

A low-carb eating plan is when only 26-45% of total calories come from carbohydrates. It limits foods that are high in carbs, such as grains, sweets, and starchy vegetables. With a low-carb plan, you eat mostly non-starchy vegetables, healthy fats, and protein. This type of plan is not recommended for some people with diabetes. Be sure to talk to your diabetes care team before you choose a low-carb approach.

Following a low-carb eating plan may help lower your A1C, blood pressure, and triglycerides. It may also help you manage your weight.

Many different kinds of eating plans help manage diabetes. Work with your diabetes care team to find a plan that's right for you.

**“I am definitely noticing that I’m tracking foods consistently now. Thanks!”\***

— NovoCare® Education & Resources Member

## CARB COUNTING BASICS

**In this section:**

- ✓ **What are carbohydrates?**
- ✓ **Carbs and diabetes**
- ✓ **Know what you’re eating**
- ✓ **Sample eating plans**
- ✓ **Advanced carb counting**

\*Individual results may vary.

## What are carbohydrates?

There are 3 main types of carbohydrates (*carbs*) in the foods you eat. They are **starch**, **fiber**, and **sugar**. Each type of carb affects your blood glucose in a different way.

When you look at food labels, “total carbohydrate” includes all three types. This is the number you should look at if you are counting carbs. For more information about reading food labels, see pages 20-22.

### Starch

Starches are also called *complex carbohydrates*. Try to incorporate whole grains that are minimally processed.

Foods that are high in starch include:

- Starchy vegetables, like corn, squash, plantain, and potatoes
- Beans, lentils, and peas
- Grains, like wheat, oats, rice, barley, and quinoa
- Foods made from wheat, like pasta and bread

#### Effect on blood glucose levels

Starchy foods raise blood glucose levels, but not as fast as sugary foods.

## Fiber

Fiber is the kind of carb found in plant foods, like vegetables, fruits, beans, whole grains, nuts, and seeds. Your body does not digest fiber. Fiber helps you feel full after eating and have regular bowel movements. It may also reduce your cholesterol.

For good health, adults should try to eat 25 to 30 grams of fiber each day. Most of us only eat about half that amount.

Foods that are good sources of fiber include:

Beans and legumes, (like black beans, kidney beans, chick peas, and lentils)

Fruits and vegetables, especially those with skin you can eat (like apples) and those with seeds you can eat (like berries)

Whole grains (like oats, barley, brown rice, whole-grain cereals and breads, and whole-wheat pasta)

Nuts and seeds

#### Effect on blood glucose levels

Fiber slows down digestion. This means that eating fiber-rich food helps your blood glucose levels rise slowly.

Visit [NovoCare.com](http://NovoCare.com) to learn more about how carbohydrates affect your blood glucose levels.

## Sugar

Sugar is also called *simple* or *fast-acting carbohydrate*. There are 2 main types of sugar:

Sugar that occurs naturally in food, like in milk and in fruit

Sugar that is added to food, like in sweet desserts and in many packaged foods and sugar-sweetened drinks

### Effect on blood glucose levels

Sugary foods and drinks, such as pastries, desserts, breakfast cereals, fruit juices, and soft drinks, raise blood glucose levels very quickly after you eat them.

## Sugar substitutes

There are many products on the market that contain sugar substitutes. You can also buy them as tabletop sweeteners or in packets to add to your food. Some examples are:

- Saccharin (Sweet'n Low)
- Aspartame (NutraSweet, Equal, Sugar Twin)
- Sucralose (Splenda)
- Stevia
- Luo han guo (monk fruit)

Be sure to check the nutrition label. Some foods labeled as "sugar-free" or "no sugar added" may still have carbohydrates in them.

### Effect on blood glucose levels

Most sugar substitutes do not effect blood glucose levels. They also have little or no calories.

Visit [NovoCare.com](https://www.novocare.com) to learn more about making healthy food choices to help you manage your diabetes.

## Carbs and diabetes

When you digest foods and drinks with carbs, the carbs break down into glucose to fuel your cells. This causes the body's blood glucose level to rise. That doesn't mean you have to stop eating carbs. You just have to be aware of the amount you eat. Carbohydrates are an important part of a balanced diet.

## How many carbs should you eat?

A good starting place for people with diabetes is:

- For most women, about 45 to 60 grams of carbs per meal and 15 grams per snack
- For most men, about 60 to 75 grams of carbs per meal and 15 to 30 grams for one or two snacks

This amount depends on how active you are, your weight, and any medicines you might take. Your registered dietitian or diabetes care and education specialist can help you figure out the right amount for you.

Knowing how many carbs you should eat at each meal and snack is important. Why? Because when you know the amount of carbs that is right for you, you can choose foods and portion sizes to help you meet your blood glucose goals. In the boxes on the next page, write the amount of carbs recommended by your diabetes care team.

## My recommended carbs

Per day

Per meal

Per snack

## Know what you're eating

All packaged foods must show a Nutrition Facts label. The label gives important facts about what's in the food. Use it to compare foods and to help you make decisions about the foods you choose to eat.

These food labels are very helpful if you use carb counting to plan your meals.

Visit [NovoCare.com](https://www.novocare.com) to learn more about carbs and blood glucose. You can also find helpful fact sheets about low and high blood glucose levels.

## How to read a Nutritional Facts label

▶ **Check the serving size.** Information on the label is based on 1 serving size. Keep in mind that packages and cans often contain more than 1 serving.

This example label shows that the package contains 8 servings. But the food facts given are for only 1 serving.

▶ **Check how many grams of total carbs** are in each serving.

▶ **Notice how many grams of fiber** are in each serving. Your body doesn't digest fiber, so it doesn't affect your blood glucose. Compare food labels and choose foods with the most fiber.

▶ **Check how many grams of added sugar** the food contains. This is sugar that was added to the food as it was made.

Use the Nutrition Facts label to help you make other healthy choices. The ADA recommends that you:

- Keep saturated fats to less than 10% of total daily calories each day
  - Limit fatty meats and high-fat dairy
- Avoid trans fats
- Restrict cholesterol intake to less than 300 mg/day
- Reduce sodium intake to less than 2,300 mg/day

First read the label and know what's in the food. Then decide if the food fits into your eating plan.

\* The % Daily Value (DV) tells you how much a nutrient in a serving of food contributes to a daily diet. 2,000 calories a day is used for general nutrition advice.

## Portion sizes matter!

It's important to eat healthy foods. But eating the right amount of food matters, too. It's even possible to eat too much healthy food!

For example, a small 3-ounce apple (the size of a small fist) has about 15 grams of carbs.

A large apple has about 30 grams of carbs. That's a big difference!

Visit [NovoCare.com](http://NovoCare.com) to learn how small diet adjustments can make a big difference.

A serving and a portion are not the same. A serving is a set, measured amount of food. A portion is the amount of a food you choose to eat at any one time. A portion may be more or less than 1 serving. You can find serving sizes for packaged foods on the Nutrition Facts label.

To make sure your portion sizes are right, it's a good idea to weigh and measure your foods after they are cooked. Soon you'll be used to seeing and eating portions that are right for you. Over time you may not need to measure anymore. But it's still helpful to do it every once in a while. Why? Because your portions may have grown without you realizing it.

Use the food look-up tool starting on page 45 of this book to see recommended serving sizes of the foods you choose.

How some of your favorite foods have changed over time:

	20 years ago	Today
<b>Bagel</b>	 3 inches across	 6 inches across
<b>Muffin</b>	 1.5 ounces	 4.5 ounces
<b>Soda</b>	 6.5 ounces	 20 ounces
<b>Pasta</b>	 1 cup	 2 cups

Visit [NovoCare.com](http://NovoCare.com) to learn more about food choices and serving sizes.

## When you can't measure, estimate!

Knowing how much you eat at each meal can help you meet your blood glucose goals. When you can't weigh or measure, you can estimate portion sizes. Your hand is a helpful tool. Best of all, it's always with you no matter where you are!

Your loose fist = **about 1 cup**  
(milk, yogurt, dry cereal, etc.)

Your palm = **about 3 ounces**  
of cooked, boneless meat

Your thumb = **about 1 tablespoon**  
of peanut butter or salad dressing

The tip of your thumb = **about 1 teaspoon**  
of butter or oil

Your open hand = **about 1 slice**  
of whole-wheat bread

Your cupped hand = **about ½ cup**  
rice, oatmeal, or nuts

Keep in mind that all hands are different sizes. First compare your fist size to a measuring cup, then start estimating!

## Sample eating plans

Now that you know a little more about carbs and portion sizes, it's time to start building balanced meals. Your eating plan may have low, medium, or higher amounts of carbs. Talk with your registered dietitian, diabetes care and education specialist, or another member of your diabetes care team about which eating plan is right for you. See the next pages for some examples of medium-carb meals and snacks to help manage your diabetes.

The American Diabetes Association (ADA) recommends these key tips for any eating plan:

- Add a lot of nonstarchy vegetables
- Limit added sugars and refined grains
- Choose whole foods over processed foods whenever possible

Visit [NovoCare.com](http://NovoCare.com) to learn how to keep making diabetes-friendly food choices that you actually enjoy.

### SAMPLE 1: Medium-Carb Eating Plan

Food	Carb grams
<b>Breakfast</b>	
2 slices bread, whole-wheat	28
1 egg, scrambled	0
½ cup blueberries	10
<b>Total meal carbs:</b>	<b>38</b>
<b>Lunch</b>	
Tuna sandwich:	
1 whole-wheat pita pocket, 1 oz	15
6 oz tuna, canned in water	0
1 cup tomatoes and cucumbers, chopped	<5
1 tbsp salad dressing, ranch, fat-free	<5
1 cup peaches, canned, water pack	15
<b>Total meal carbs:</b>	<b>30</b>
<b>Afternoon snack</b>	
1 cup baby carrots	12
¼ cup hummus	9
<b>Total meal carbs:</b>	<b>21</b>
<b>Dinner</b>	
4 oz white fish, such as tilapia, grilled or broiled	0
2 tbsp olive oil	0
½ cup quinoa, cooked	20
1 cup kale, cooked	7
½ cup green peas, frozen, cooked	13
<b>Total meal carbs:</b>	<b>40</b>
<b>Evening snack</b>	
6 oz yogurt, Greek, plain, nonfat	6
½ cup pineapple	11
<b>Total meal carbs:</b>	<b>17</b>
<b>Total daily carbs:</b>	<b>146</b>
<b>Total daily calories:</b>	<b>1,536</b>

<5 means less than 5 grams of carbs. Foods with less than 5 grams of carbs do not get added to your carb total.

### SAMPLE 2: Medium-Carb Eating Plan

Food	Carb grams
<b>Breakfast</b>	
½ cup oats, cooked	14
1 cup cantaloupe, sliced	14
¼ cup walnuts, plain, chopped	<5
<b>Total meal carbs:</b>	<b>28</b>
<b>Mid-morning snack</b>	
Smoothie:	
½ cup coconut milk, unsweetened	6
1 cup strawberries	14
½ cup banana slices	17
½ cup crushed ice	0
<b>Total meal carbs:</b>	<b>37</b>
<b>Lunch</b>	
4 oz chicken breast, boneless, skinless	0
1 large roll, 2 oz, whole wheat	25
1 cup green beans, cooked	7
1 cup cauliflower, cooked	5
1 tbsp olive oil	0
<b>Total meal carbs:</b>	<b>37</b>
<b>Dinner</b>	
Pasta with meat and vegetables:	
1 cup flat noodles, whole wheat, cooked	23
1 cup broccoli, cooked	12
1 cup cabbage, cooked	8
4 oz pork loin, cooked and minced	0
1 tbsp olive oil	0
<b>Total meal carbs:</b>	<b>43</b>
<b>Evening snack</b>	
6 oz yogurt, Greek, plain, nonfat	6
1 small orange (2-5/8" diameter)	16
<b>Total meal carbs:</b>	<b>22</b>
<b>Total daily carbs:</b>	<b>167</b>
<b>Total daily calories:</b>	<b>2,072</b>

## Advanced carb counting

Advanced carb counting is often used by people who take mealtime insulin 2 or more times a day. First you count the number of grams of carbs in a meal. Then you match that to your dose of mealtime insulin. This is known as an insulin-to-carb ratio.

To get started, write down what you eat and drink for a few days and how many grams of carbs you eat each day. Record your blood glucose level before and about 2 to 3 hours after each meal. Doing these things helps you see how your meals affect your blood glucose. Share this information with your diabetes care team.

### Example

<b>Meal:</b> Breakfast	
<b>What I ate:</b>	<b>Carbs:</b>
1 cup cereal	25 grams
1 cup milk	12 grams
½ banana	9 grams
<b>Total carbs:</b>	<b>46 grams</b>
<b>Blood glucose before:</b> 90 mg/dL	<b>Blood glucose 2 hours after:</b> 130 mg/dL

You can find how many grams of carbs foods have by reading food labels. You can also use the food lists starting on page 45 for foods without a label, like fruits and vegetables.

## Carbs and blood glucose

<b>Meal:</b>		
<b>What I ate:</b>	<b>Carbs:</b>	
_____	_____	
_____	_____	
_____	_____	
_____	<b>Total carbs:</b>	
_____	_____	
<b>Blood glucose before:</b>		<b>Blood glucose 2 hours after:</b>

You and your diabetes care and education specialist, or another member of your diabetes care team, will plan how many grams of carbs you should eat at meals and snacks. Then you can choose which foods you would like to eat at those times.

Advanced carb counting may seem hard at first, but it might give you more choices and flexibility when planning your meals.

Visit [NovoCare.com](http://NovoCare.com) to request or download a Blood Glucose Tracker.

## Where healthy meets delicious!

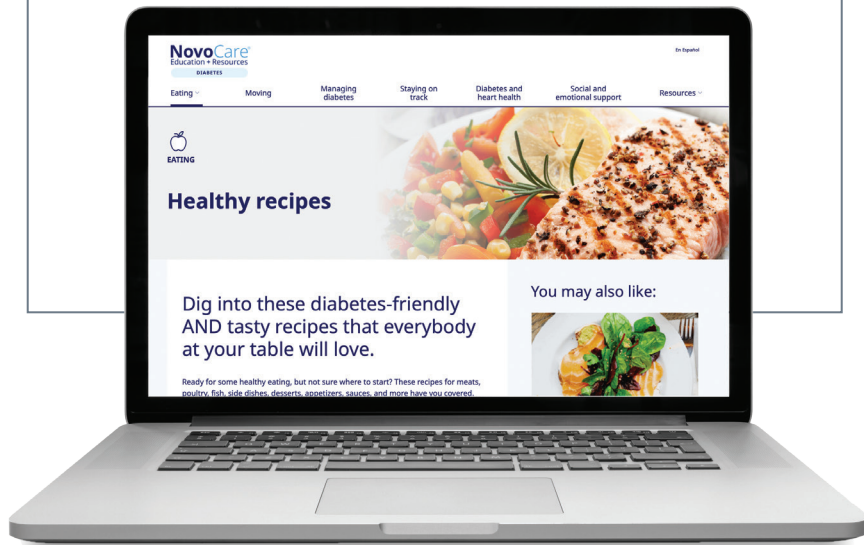

Looking for a new diabetes-friendly recipe that everybody at your table will enjoy?

So many tasty recipes to choose from:

## STICK WITH IT

In this section:

- ✓ Dining out
- ✓ Setting goals for healthy eating
- ✓ Get heart-healthy
- ✓ Support is available

\*Individual results may vary.

## Dining out

Diabetes doesn't have to stop you from enjoying life's pleasures. And that includes dining out. You can eat in restaurants and still stay on your eating plan. Here are some tips that may help.

### Tips when dining out

#### Stay on schedule

When you eat may be important if you take diabetes medicines. Plan ahead and make reservations. Try to avoid going at restaurants' busiest times, so you don't have to wait too long to eat.

#### Pick your portion

Ask for half or "lunch" size portions if that's the right amount of food for you. Or ask for half of your food in a to-go box before you start to eat.

#### Ask for what you want

Think about how you want your food cooked. Instead of fried, ask for broiled, roasted, grilled, or steamed. You can also ask for egg whites, whole-grains, and skinless poultry to help you stick with your eating plan.

#### Add color

When you build a colorful plate, you are adding more fruits and vegetables that make up all the colors of the rainbow. This ensures you are getting a variety of different nutrients in your meal.

#### Watch what you drink

Sweetened sodas, shakes, and alcohol can add hundreds of calories and fat to your meal. Better choices might be water, unsweetened iced tea, or sparkling water.

Visit [NovoCare.com](https://www.novocare.com) to learn how to make dining out healthier.

## Fast food options

Sometimes fast food may be your only option. But if you plan ahead, you can make smart choices that fit your eating plan. Many fast-food chains now give nutritional information for all menu items. Check it before you order.

Here are some tips to help you make healthy choices at common types of fast-food restaurants:

### Burger chains

- Avoid “double” or “triple” burgers. Try single patties instead
- Add vegetable toppings like lettuce and tomato to help fill you up
- Choose grilled chicken, not crispy fried
- Head to the salad bar, but choose your toppings and dressing wisely
- If you really want the fries, split a small order with someone else
- Mustard is better than ketchup, and both are better than mayonnaise

### Pizza

- Order thin-crust pizza and top it with vegetables
- Avoid high-fat meats, such as pepperoni and sausage, and extra cheese
- Add a side salad for a more balanced meal
- Order cauliflower crust, if available

### Sandwich shops

- Order a turkey breast, roast beef, or vegetable sandwich on whole-wheat bread or a wrap
- Avoid over-sized sandwiches
- Choose vegetable toppings for your sandwich, like lettuce and tomato or salsa
- Stay away from high-fat sauces, dressings, and mayonnaise

Ask for nutritional information before you order or look online before you go. Use it to help you make healthy food choices, including:

- Choose whole grains
- Minimize salt
- Stick to moderate portion sizes

Visit [NovoCare.com](http://NovoCare.com) for help with sticking to your diabetes eating plan.

## Mexican

- Tacos, burritos, and wraps can be added to most eating plans
- Avoid all foods that are supersized, stuffed, or fried
- Try adding lots of vegetables
- Request a whole-wheat wrap when possible
- Use salsa, but go easy on cheese, sour cream, and guacamole

## Asian

- Try sushi with brown rice
- Ask to have your chicken, veggies, or fish steamed or stir-fried
- Avoid fried foods and tempura
- Skip sweet and sour foods

## Indian

- Order tandoori or kebabs
- Avoid anything fried
- Skip curries with coconut milk or cream
- Choose salads with fresh vegetables

## Drinking alcohol

Be sure to talk to your diabetes care team about drinking alcohol with any of the medicines you may take. Then if your diabetes is managed and your doctor says it's okay, go ahead and enjoy an alcoholic drink with a meal once in a while. But keep in mind that alcohol adds empty calories and can cause your blood glucose level to drop. Don't skip meals or drink on an empty stomach.

If you drink alcohol, choose options with fewer calories and carbohydrates, such as:

- Light beer
- Dry wines
- Mixed drinks made with sugar-free mixers, such as club soda or seltzer

If you choose to drink, follow the guidelines recommended for adults with diabetes or prediabetes:

### Women:

1 drink or less  
per day

### Men:

2 drinks or less  
per day

One drink is equal to a 12 oz beer, 5 oz glass of wine, or 1½ oz distilled spirits (vodka, whiskey, gin).

Visit [NovoCare.com](https://www.novocare.com) to see how your food choices play a part in diabetes management.

## Setting goals for healthy eating

Take one step at a time. Trying to change everything about how you eat all at once can make it hard to stick to. Instead start by setting small simple goals. You can then try for bigger goals you may want to set for yourself. Fill in a few of your eating goals below.

### My goals for healthy eating

Example

**Goal:** I will eat more fiber

**How:** I will have brown rice or whole-wheat pasta once a week.

**Goal:**

**How:**

**Goal:**

**How:**

**Goal:**

**How:**

## Get heart-healthy

People with diabetes are 2 times more likely to have heart disease or a stroke than people without diabetes. Making small changes to how you cook may help you reduce your risk for heart disease. To help protect your heart and blood vessels try to:

- Make food choices that include healthy fats and limit those with less healthy fats
- Get to and maintain a healthy weight for you
- Cut down on foods that are high in sodium, especially if you have high blood pressure
- Include foods high in omega-3s (like salmon, albacore tuna, and mackerel)
- Choose healthy cooking methods (like broiling, roasting, or grilling)
- Have fresh, homemade foods over packaged (store bought) when possible

Visit [NovoCare.com](http://NovoCare.com) to enroll in NovoCare® Education & Resources for Diabetes, that includes access to the Diabetes Health Coach program.

## Support is available

Healthy eating is good for everyone, not just for people with diabetes. Eating healthy meals with family and friends benefits all of you. And it supports your goals.

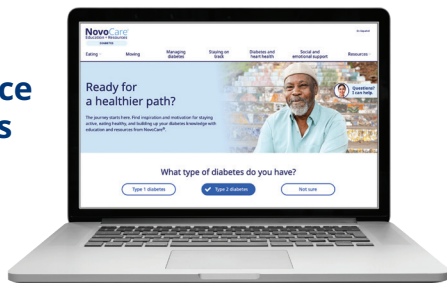

If there is not a registered dietitian on your diabetes care team, you can ask your team to refer you to one. A dietitian can help you learn more about healthy eating. And he or she can support you as you work to meet your diabetes and overall health goals.

Support for healthy eating is available in more places than you may think. Many local chain food stores, hospitals, pharmacies, and community centers offer educational classes about healthy eating with diabetes.

## PLANNING YOUR MEALS

### In this section:

✓ Starch	46
✓ Fruit	50
✓ Milk and yogurts	53
✓ Vegetables	54
✓ Protein	57
✓ Fats	64
✓ Combination foods	66
✓ Sweets and desserts	68
✓ Condiments and sauces	70
✓ Fast foods	71
✓ Alcohol	76
✓ My food list	77

## Planning your meals

You and your diabetes care team will decide the right type of eating plan for you. Perhaps you will be using the plate method (see page 10). Or you may be counting carbs (see page 9). No matter which plan you follow, the food lists on the next pages of this booklet can help you make good choices.

## Food lists

All packaged and canned foods must show a Nutrition Facts label. Be sure to read them. Always check serving sizes. Many foods do not have food labels. But you can find the carbohydrate count of some of them in the lists included here.

- ✓ Place a check mark in the boxes next to your favorite foods. Use these foods to help you build balanced meals.

### Free foods

Look for this symbol

Look for this symbol in the food lists. These foods are low in carbs and/or high in fiber. They are good choices to spread out during the day. For people with diabetes, free foods make good choices for snacks or to add flavor.

Visit [NovoCare.com](https://www.novocare.com) for healthy recipes you can dig into and your family will love.

# Starch

Starchy foods, such as bread, pasta, rice and cereal, provide carbohydrate, the body's energy source. Choose starchy foods that are whole grain and high in fiber for overall good nutrition.

✓ Food	Serving Size	Calories	Carbs (g)	Fiber (g)	Protein (g)
<b>Bread</b>					
<input type="checkbox"/>	Bagel, plain (includes onion, poppy, sesame)	72	14	1	3

<input type="checkbox"/>	Lentils, cooked	1/2 cup	115	20	8	9
<input type="checkbox"/>	Refried beans, canned, vegetarian	1/2 cup	100	16	6	6

# Fruit

Fruit contains carbohydrate, so you need to count it as part of your eating plan. Fresh fruit or fruit salad is a perfect choice for a healthy sweet dessert. Fruit is full of vitamins, minerals, and fiber just like vegetables.

✓ Food	Serving Size	Calories	Carbs (g)	Fiber (g)	Protein (g)
<b>Fruit (Fresh)</b>					
<input type="checkbox"/>	Apple, unpeeled, small	77	21	4	0
<input type="checkbox"/>	Banana 1 extra small, less than 6 inches long (approx 3 oz)	72	19	2	1
<input type="checkbox"/>	Blackberries ¾ cup (approx 4 oz)	46	10	6	2
<input type="checkbox"/>	Blueberries ¾ cup (approx 4 oz)	63	16	3	1
<input type="checkbox"/>	Cantaloupe 1 cup diced (5½ oz)	53	13	1	1
<input type="checkbox"/>	Cherries, sweet, fresh 12 (3½ oz)	62	16	2	1
<input type="checkbox"/>	Clementine 1 fruit	35	9	1	1
<input type="checkbox"/>	Figs, fresh 2 medium (3½ oz)	74	19	3	1
<input type="checkbox"/>	Grapes, red or green 17 small (approx 3 oz)	57	15	0	1
<input type="checkbox"/>	Grapefruit, fresh ½ large (approx 6 oz)	53	13	2	1

✓ Food	Serving Size	Calories	Carbs (g)	Fiber (g)	Protein (g)
<input type="checkbox"/>	Guava 2 fruit (approx 4 oz)	75	16	6	3
<input type="checkbox"/>	Honeydew melon 1 cup diced (6 oz)	61	15	1	1
<input type="checkbox"/>	Kiwi fruit ½ cup, sliced	55	13	3	1
<input type="checkbox"/>	Mango ½ cup (approx 3 oz)	50	12	1	1
<input type="checkbox"/>	Orange 1 large (6½ oz)	86	22	4	2
<input type="checkbox"/>	Papaya 1 cup (approx 5 oz)	62	16	3	1
<input type="checkbox"/>	Peach, fresh 1 medium (approx 5 oz)	58	14	2	1
<input type="checkbox"/>	Pear, fresh ½ large (4 oz)	66	18	4	0
<input type="checkbox"/>	Pineapple, fresh ¾ cup	62	16	2	1
<input type="checkbox"/>	Plantain, raw ½ cup (2½ oz)	90	24	2	1
<input type="checkbox"/>	Plums, fresh 2 small (approx 5 oz)	61	15	2	1
<input type="checkbox"/>	Pomegranate seeds (arils) ½ cup	72	16	4	1
<input type="checkbox"/>	Raspberries 1 cup (4 oz)	64	15	8	1
<input type="checkbox"/>	Strawberries 1¼ cups whole berries (6 oz)	58	14	4	1
<input type="checkbox"/>	Tangerine 1 large (4 oz)	64	16	2	1
<input type="checkbox"/>	Watermelon 1¼ cups diced (7 oz)	57	14	1	1

✓ Food	Serving Size	Calories	Carbs (g)	Fiber (g)	Protein (g)
<input type="checkbox"/> Fruit Juice					
<input type="checkbox"/> Apple juice, unsweetened	½ cup	57	14	0	0
<input type="checkbox"/> Cranberry juice cocktail, bottled	½ cup	68	17	0	0
<input type="checkbox"/> Orange juice	½ cup	56	13	0	1
<input type="checkbox"/> Vegetable and fruit juice blends, 100% juice	1 cup	113	27	0	1

Many fruits are high in fiber, especially those with the skin or pulp. Fruits can also satisfy a sweet tooth without having candy and other desserts.

✓ Choose fresh or frozen fruits

✗ Avoid processed fruits in a can or jar

✗ Avoid fruit juices with added sugar

## Milk and Yogurts

Including low-fat dairy products in your eating plan is a great way to get calcium and high-quality protein.

✓ Food	Serving Size	Calories	Carbs (g)	Fiber (g)	Protein (g)
<b>Dairy - Milk</b>					
<input type="checkbox"/> Milk, low-fat (1%)	1 cup	105	12	0	9
<input type="checkbox"/> Milk, reduced-fat (2%)	1 cup	125	12	0	9
<input type="checkbox"/> Milk, whole	1 cup	149	12	0	8
<b>Dairy - Yogurt</b>					
<input type="checkbox"/> Yogurt, Greek, plain, nonfat	6 oz	100	6	0	17
<input type="checkbox"/> Yogurt, plain, low-fat	8 oz	143	16	0	12
<b>Non-dairy</b>					
<input type="checkbox"/> Almond milk	1 cup	60	8	1	1
<input type="checkbox"/> Coconut milk	¼ cup	138	3	1	1
<input type="checkbox"/> Oat milk	1 cup	60	5	0	1
<input type="checkbox"/> Soy milk, plain	1 cup	100	8	1	7

# Vegetables

For good health, try to eat at least 3 to 5 servings of non-starchy vegetables a day. More is better!

A serving of vegetables is:

- ½ cup of cooked vegetables
- 1 cup of raw vegetables

✓ Food	Serving Size	Calories	Carbs (g)	Fiber (g)	Protein (g)
<b>Starchy Vegetables</b>					
<input type="checkbox"/> Corn, cooked	½ cup	72	16	2	3
<input type="checkbox"/> Corn, sweet, yellow, frozen, kernels on cob, unprepared	1 ear	122	30	4	4
<input type="checkbox"/> Peas, green, cooked	½ cup	67	13	4	4
<input type="checkbox"/> Plantain, cooked	⅓ cup	60	16	1	0
<input type="checkbox"/> Potato, baked with skin	1 small (approx 5 oz)	128	29	3	3
<input type="checkbox"/> Potato, boiled, all kinds	½ cup (approx 3 oz)	68	16	1	1
<input type="checkbox"/> Potato, mashed, with milk and butter	½ cup (approx 4 oz)	119	18	2	2
<input type="checkbox"/> Squash, winter, all varieties, baked	1 cup	76	18	6	2

✓ Food	Serving Size	Calories	Carbs (g)	Fiber (g)	Protein (g)
<b>Non-starchy Vegetables</b>					
<input type="checkbox"/> Sweet potato, plain	½ cup (3½ oz)	90	21	3	2
<input type="checkbox"/> Yam, cooked	½ cup (2½ oz)	79	19	3	1
★ <input type="checkbox"/> Asparagus, cooked	½ cup	20	4	2	2
<input type="checkbox"/> Beans, green or yellow, raw	1 cup	31	7	3	2
<input type="checkbox"/> Beets, cooked	½ cup	37	8	2	1
★ <input type="checkbox"/> Bitter melon, cooked	1 cup	24	5	3	1
<input type="checkbox"/> Broccoli, cooked, chopped	½ cup	27	6	3	2
<input type="checkbox"/> Brussels sprouts, cooked	½ cup	28	6	2	2
★ <input type="checkbox"/> Cabbage, cooked, shredded	½ cup	17	4	1	1
<input type="checkbox"/> Carrots, slices, cooked	½ cup	27	6	2	1
★ <input type="checkbox"/> Cauliflower, cooked, chopped	½ cup	14	3	1	1
<input type="checkbox"/> Celery, cooked	1 cup	27	6	2	1
<input type="checkbox"/> Collard greens, cooked	1 cup	63	11	8	5
<input type="checkbox"/> Cucumber, slices, raw	½ cup	8	2	0	0

✓ Food	Serving Size	Calories	Carbs (g)	Fiber (g)	Protein (g)
<b>Non-starchy Vegetables (continued)</b>					
<input type="checkbox"/> Eggplant, cooked	1 cup	35	9	3	1
<input type="checkbox"/> Kale, cooked	1 cup	36	7	3	2
<input checked="" type="checkbox"/> Lettuce, green leaf	1 cup shredded	5	1	1	0
<input checked="" type="checkbox"/> Mushrooms, stir-fried	½ cup pieces	14	2	1	2
<input checked="" type="checkbox"/> Okra, cooked	½ cup	18	4	2	2
<input type="checkbox"/> Onions, cooked, chopped	½ cup	46	11	2	1
<input type="checkbox"/> Pea pods, cooked	1 cup	67	11	5	5
<input type="checkbox"/> Peppers (green and red varieties), cooked	1 cup	38	9	2	1
<input type="checkbox"/> Spaghetti squash	1 cup	31	7	2	1
<input type="checkbox"/> Spinach, cooked	1 cup	41	7	4	5
<input checked="" type="checkbox"/> Squash, summer, all varieties, raw	½ cup	9	2	1	1
<input checked="" type="checkbox"/> Swiss chard, cooked	½ cup	18	4	2	2
<input type="checkbox"/> Tomato, ripe, chopped	1 cup	32	7	2	2
<input checked="" type="checkbox"/> Turnips, cooked	½ cup	17	4	2	1

## Protein

Choose poultry without the skin for less saturated fat and cholesterol. Choose round and loin cuts of beef and pork.

✓ Food	Serving Size	Calories	Carbs (g)	Fiber (g)	Protein (g)
<b>Lean (Approximately 0-4 grams of fat per serving)</b>					
<input checked="" type="checkbox"/> Beef, ground, 90% lean meat/10% fat, cooked, pan-browned	1 oz	65	0	0	8
<input checked="" type="checkbox"/> Beef, liver, raw	1 oz	38	1	0	6
<input checked="" type="checkbox"/> Buffalo, cooked, roasted	1 oz	37	0	0	8
<input checked="" type="checkbox"/> Cheese, nonfat or fat-free	About 1 oz	24	2	0	4
<input checked="" type="checkbox"/> Chicken, liver, raw	1½ oz	52	0	0	7
<input checked="" type="checkbox"/> Chicken, roasted	¼ cup	66	0	0	10
<input checked="" type="checkbox"/> Chicken, ground, cooked, pan-browned	1 oz	54	0	0	7

★ <input type="checkbox"/> Tofu, firm	1 slice	52	2	0	6

Plant-based protein foods provide quality protein, healthy fats, and fiber. They vary in how much fat and carbohydrate they contain, so make sure to read labels.

# Fats

To lower your risk for heart disease, try to eat less saturated and trans fat — the unhealthy fats. Less than 10% of your total daily calories should come from saturated fat.

✓ Food	Serving Size	Total fats (g)	Calories	Carbs (g)	Fiber (g)	Protein (g)
<b>Unsaturated Fats</b>						
★ <input type="checkbox"/> Almonds	6	4	42	2	1	2
★ <input type="checkbox"/> Avocado, fresh	1 (approx 5 oz)	21	227	12	9	3
★ <input type="checkbox"/> Flaxseeds, ground	1½ tbsp	4	56	3	3	2
★ <input type="checkbox"/> Mayonnaise, regular	1 tbsp	12	103	0	0	0
<input type="checkbox"/> Mayonnaise-style salad dressing, regular	1 tbsp	10	94	0	0	0
★ <input type="checkbox"/> Nut butters (trans fat-free): almond butter, cashew butter, peanut butter	1 tbsp	8	97	5	1	2
★ <input type="checkbox"/> Oil: canola, corn, cottonseed, grape seed, olive, peanut, safflower, soybean, sunflower	1 tsp	5	40	0	0	0

✓ Food	Serving Size	Total fats (g)	Calories	Carbs (g)	Fiber (g)	Protein (g)
<b>Saturated Fats</b>						
★ <input type="checkbox"/> Olives, green, pickled	10	4	39	1	1	0
★ <input type="checkbox"/> Pecans	¼ oz	5	49	1	1	1
★ <input type="checkbox"/> Walnuts, English	½ oz	9	93	2	1	2
<b>Saturated Fats</b>						
★ <input type="checkbox"/> Butter, light, stick	1 tsp	3	23	0	0	0
★ <input type="checkbox"/> Cream, half and half	2 tbsp	3	39	1	0	1
★ <input type="checkbox"/> Cream cheese, fat-free	1½ tbsp (1 oz)	0	28	2	0	4
★ <input type="checkbox"/> Oil: coconut, palm	1 tsp	5	39	0	0	0
★ <input type="checkbox"/> Shortening, lard and vegetable oil	1 tsp	4	38	0	0	0
★ <input type="checkbox"/> Sour cream, reduced-fat	3 tbsp	5	65	3	0	3

## Combination Foods

Prepare foods that aren't breaded or fried. The breading adds to your carb count and your calorie count.

✓ Food	Serving Size	Calories	Carbs (g)	Fiber (g)	Protein (g)
<b>Entrees</b>					
<input type="checkbox"/> Beef stew, canned	7 oz	194	15	2	9
<input type="checkbox"/> Chili with meat and beans	About 5 oz	214	6	2	17
<input type="checkbox"/> Lasagna with meat	8 oz	423	26	3	25
<input type="checkbox"/> Mac and cheese with cheese sauce	7 oz	310	44	2	13
<input type="checkbox"/> Spaghetti with meatballs	About 5 oz	228	21	2	11
<b>Salads (Deli-Style)</b>					
<input type="checkbox"/> Coleslaw	½ cup	146	14	2	1
<input type="checkbox"/> Potato salad	½ cup	179	14	2	3
<input type="checkbox"/> Tuna salad	½ cup (3½ oz)	192	10	0	16

✓ Food	Serving Size	Calories	Carbs (g)	Fiber (g)	Protein (g)
<b>Soups</b>					
<input type="checkbox"/> Chicken noodle soup	1 cup (about 8 oz)	100	9	2	8
<input type="checkbox"/> Clam chowder (made with low-fat milk)	1 cup (about 8½ oz)	154	19	1	8
<input type="checkbox"/> Egg drop soup	1 cup (about 8½ oz)	65	10	1	3
<input type="checkbox"/> Split pea soup	1 cup (about 9 oz)	180	30	5	10
<input type="checkbox"/> Tomato soup (made with water)	1 cup (about 8½ oz)	74	16	2	2

Many foods are a mix of starch and protein, stacked up or mixed together. You can still fit combination foods into the plate method eating plan:

- For lasagna, simply fill half of your plate with the combo of meat and starch. Then fill the other half of your plate with non-starchy vegetables
- For soup or chili, add plenty of non-starchy vegetables. Try to keep the portions similar to that of a plate

## Sweets and desserts

It is important to remember that most sweets have a lot of calories and carbs in a small portion. Be sure to be mindful of the serving size.

✓ Food	Serving Size	Calories	Carbs (g)	Fiber (g)	Protein (g)
<b>Desserts</b>					
<input type="checkbox"/> Brownies	About 1 oz	115	18	1	1
<input type="checkbox"/> Cake, unfrosted	1 piece (2½ oz)	264	42	1	4

<input type="checkbox"/>	Taco salad 1 salad (3½ oz)	170	15	3	7

Tips you can use when ordering fast food:

- Choose whole grains when possible
- Create a meal that has a variety of food groups
- Choose menu items that include non-starchy vegetables
- Don't add any extra salt
- Don't order the large size

## Novo Nordisk is dedicated to diabetes

### Diabetes is our passion and our business

As a leader in diabetes, Novo Nordisk is dedicated to improving diabetes care worldwide. Since 1923, we have been focused on innovation and leadership in diabetes care.

The Novo Nordisk Patient Assistance Program (PAP) is our continued commitment to people living with diabetes. If you are having trouble affording your Novo Nordisk medicine, you may qualify for help. Call Novo Nordisk PAP toll-free at 1-866-310-7549 Monday to Friday from 8:00 AM to 8:00 PM EST to see if you qualify.

For questions about Novo Nordisk products or to request a Blood Glucose Tracker, call the Customer Care Center at 1-800-727-6500 (option 8 for Spanish) from 8:30 AM to 6:00 PM EST.

## NovoCare® Education + Resources

DIABETES

The more you know about diabetes, the better you will be able to manage it. Ask your doctor for these **FREE** books. For even more information, go to **NovoCare.com**.

This educational booklet series is designed to help people with diabetes work with their diabetes care teams to learn about and manage diabetes.

### Diabetes and you

This booklet gives you key information about diabetes and why it happens. It also offers tools and resources to help you manage your diabetes.

### Living with diabetes

Take steps to manage your diabetes by eating healthy, being active, and taking medicines. This booklet gives you more information about how to live well with diabetes.

### Staying on track

Reading this booklet can help you understand more about blood glucose goals and what your numbers mean. Learn how to monitor your health and use a tracker to fill in your blood glucose readings.
